WaspTime : What does Payroll Export Interface mean and what is my Payroll ID?

Max Holden - 2017-04-10 - Wasptime Version 6

If you are using a third party payroll processor application or service, you can select here what format to export from WaspTime the time summary for the payperiod.

Your Payroll ID will come from the processor. If you are using Quickbooks it is not needed and you can leave it blank unless you are using Quickbooks to process more than one company payroll.
