## **WCS3900 - I am trying to read barcodes with my WCS3900 or WCS3905 scanner, but it will not scan.**

Internal User - 2017-04-10 - [WCS3900/3905/3950](#)

The WCS3900 & WCS3905 CCD scanners are contact scanners, they must be physically touched to the barcode you are scanning.

The Wasp CCD LR (890x) (long range) scanner is an exception - it can be held 12 to 15 inches away from the barcode, depending on the barcode's density and size.
