WDI4500: Scanning into Excel, the Tab or Enter keys do not work

Internal User - 2017-05-12 - WDI4500

By default, the scanner will send these characters as control-key combinations, which works for most applications. However, Excel will not properly interpret those codes. To have the scanner send the codes in a method Excel will recognize, scan the Enable Function Key Mapping barcode on page 3-10 of the User's Manual.
