WLR8900 - How can I program my Wasp CCD LR Scanner to strip off the leading 0 when decoding UPC-A bar codes?

Internal User - 2017-04-10 - in [WLR8900/8905/8950](#)

For the Wasp CCD LR Scanner:

Go to page 20 of the CCD LR Programming Guide

Scan the "Do Not Send Leading Digit" bar code
