WLS9600: Interleaved 2 of 5 Symbology is disabled by default

Scott Leonard - 2023-01-19 - Hardware

If you need to scan Interleaved 2 of 5 barcodes, you will need to enable that symbology. You will need to print page 139 (PDF page 149) from the Product Reference Guide, then scan these barcodes:

1. Enter/Exit Programming Mode
2. I 2 of 5 = Enable
3. Enter/Exit Programming Mode

The WLS9600's Product Reference Guide and Quick Reference Guides can be downloaded here if necessary: https://support.waspbarcode.com/kb/articles/835
