WPA206 - Operation: When syncing my WPA206, I get a "Mobile Data File Size Mismatch - Possible Error during file transmision" error on the PC.

Internal User - 2017-04-10 - Hardware

When you get that error message, you need to do an additional transaction on the *WPA206* such as checking an item out to yourself.

Once you've done this, reconnect the *WPA206* to the PC and synch.
