WPL printers: Scan-to-Print: scan a barcode to print a label with that barcode

Sicaro Burnett - 2020-08-21 - in Printers

Several WPL printer models are equipped with a USB port where a barcode scanner or keyboard can be connected, including:

WPL308

WPL406

WPL614

WPL618

After some initial setup, this feature allows you to create and print a barcode label without the use of a computer or labeling software. Create and print a barcode by simply typing the desired content on your USB connected keyboard, or scan an existing barcode to create and print a copy.

Download the link below for setup instructions:
