WWR2900 WandReader: How To scan 1/4" inch high barcodes that have 10-digit numbers.

Internal User - 2017-04-10 - WWR2900/2905

The WandReader can read them without reconfiguration. With such a narrow label, it may be more difficult to keep the reader within the bars.

The Wasp WCS3900 / 3905 CCD scanner will read those barcodes with much less effort on your part as long as they are not wider than the face of the scanner.
