End of TLS 1.0 and 1.1 Support

2024-01-18 - Sicaro - [General](#)

Wasp Ending Support for Windows Mobile/CE Devices Using TLS 1.0 and 1.1

Effective April 1, 2024, Wasp Barcode Technologies will no longer support Windows mobile/CE devices using TLS 1.0 or 1.1. Microsoft ended support for TLS 1.0 and 1.1 due to security risks. Any Windows mobile device using TLS 1.0 or 1.1 will no longer function with Wasp AssetCloud, InventoryCloud and PackageTracker. This includes our DT60, DT90, DT92, and HC1. Please contact us to discuss Android devices (DR6 and WTD950) we offer that are compatible with our software.

If you use Wasp's APIs for integrations with AssetCloud or InventoryCloud and you are using TLS 1.0 or 1.1, please be advised that you may encounter compatibility issues.
