Wasp Cloud & PHP

2026-10-22 - Sicaro - General

Wasp Cloud & PHP

We have reviewed the critical PHP vulnerabilities disclosed on October 21, 2026. Wasp products, including AssetCloud, InventoryCloud, and our desktop and mobile applications, do not use PHP, so it is not affected by the recently disclosed PHP vulnerabilities, including CVE-2026-109618 and CVE-2026-109619 ("PHP2Shell").

The Wasp website (www.waspbarcode.com) was fully patched the morning of October 21. Customers don’t need to do anything with their Wasp products.
